

**PROTON GROUP**  
Your formula for total hygiene

## **Odd Flavours when you Reopen your Function Room, Seasonal or Stadium Bar?**

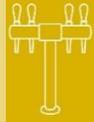

**YOU NEED**  
**Guardian<sup>®</sup> - Beer Line Protector**

From Keg To Glass

**PROTON GROUP**  
Your formula for total hygiene

Not treating your dispense lines properly when you shut-down at the end of a season will cause flavour taints and poor presentation.

**Guardian®** is specifically designed to protect infrequently or unused keg or cask beerlines from flavour taints and deposit build up.

Made with food grade ingredients, Guardian contains **NO** Surfactants which can cause head retention and carbonation issues.

The Perfect solution for stadiums, seasonal establishments and venues with unused bars or function rooms

41% of customers say that they would take their business elsewhere if served a poor quality drink.

What are the benefits of using **Guardian®**?

- ✓ Saves time and money
- ✓ Keeps dispense lines ready for service
- ✓ Reduces the number of customer complaints
- ✓ Prevents the need for costly Blitz Cleans, Deep Cleans or Resets
- ✓ Recommended for use by leading line manufacturers

## Guardian® is a Quick and Simple Step to Keep your Dispense Lines in Top Condition

Clean your lines as normal with a Proton Beer Line Cleaner

At the end of the clean mix Guardian Powder with clean cold water

Fill your Beer Lines with the Guardian Solution

When your beer lines are needed again simply flush with clean cold water and connect to your kegs

### Dosage Rates

#### (Amount of Time in Line Dilution Ratio per 10L of Water)

1-4 weeks 1% = 100g = 1 scoop

4-8 weeks 2% = 200g = 2 scoops

8+ weeks 3% = 300g = 3 scoops

### Recommissioning Lines

1. Fill the cleaning vessel with clean cold water and bleed the fob detector to ensure the cleaning solution has been flushed from the bleed valve
2. Open the dispense tap and flush through the volume in the line + 5L e.g. if the line contains 3 pints (1.7L) then a total of 7L of water is required
3. Connect back to product and draw through to the dispense tap and check quality.
